21 additional .5 hrs psyche/neuropsych test admin/score	CPT 96137	(\$125x21= \$2675)
1 psyche/neuropsych test administration with single automated standardized instrument	CPT 96146	(\$200)

If you tell the insurance company that your child is having problems in school, they may inform you that your health insurance is not designed to help a child with academic trouble. However, children who are having trouble in school are often having trouble in other areas of life. Problems may be more evident in school because school is where your child spends the most time and the demands made there are consistent. If the insurance representative asks why you are seeking the evaluation, I encourage you describe the impact of the issues at hand more broadly than the ways in which they are evident in the school setting.
